Notes

1. The most recent year and the first year for which data is shown may be incomplete.
2. In the Net Return column performance is presented net of all trading expenses, retained management fees, custodial fees and withholding taxes. The performance figures are simple averages based on underlying portfolio performance data supplied by Tacit Investment Management. Top to bottom quartiles are coloured green, purple, yellow, orange respectively.
3. ARC GBP Cautious PCI is designed to place private client discretionary portfolio performance into a group context of 33 peers. It is calculated by imposing a common categorisation across all Data Contributor portfolios. Reflecting the nature of the opportunity set available to a private client with a given risk tolerance, PCI is a yardstick for placing portfolio performance into a broad peer group context. See www.suggestus.com for more information.
4. Relative Return is the Net Return (column 2) minus the PCI return (column 3).
5. 25th percentile return indicates the lowest return in each period that would have been allocated a top quartile ranking.
6. 75th percentile return indicates the highest return in each period that would have been allocated a bottom quartile ranking.
