TACIT CONSERVATIVE STRATEGY

AS AT 30 SEPTEMBER 2026

INVESTMENT OBJECTIVE

The investment objective of this strategy is to preserve the nominal value of a portfolio over the medium term. The Tacit Conservative Strategy is designed for an investor with a time horizon of five years. The strategy is not a substitute for cash and does carry investment risk.

Within the Tacit Conservative Strategy, we would expect to maintain approximately one-quarter of your funds in growth or real assets such as equities, property and commodities, which may exhibit higher short term volatility, when compared with lower risk asset classes.

This weighting to growth assets can be tactically adjusted to take account of prevailing market conditions but we would not expect this to exceed 40% for a prolonged period at any time.

SUITABILITY

This portfolio may be suitable for investors looking to enhance the return available from cash deposits and fixed interest securities, but who also have low capacity for loss of their capital. The aim is to achieve a nominal total return greater than cash in their portfolio over five years or longer.

KEY RISKS

- Interest rates rise
- Inflation outstrips the return achieved
- Capital losses can be experienced

PORTFOLIO HOLDINGS

		% OF TOTAL ASSETS

IMPORTANT INFORMATION: Past performance cannot be relied upon as a guide to future performance. The actual values of your investment and the income returns generated from your investments may vary, and your initial investment amount cannot be guaranteed. Exchange rates may cause the value of overseas investments to rise or fall. Individual investors may realise returns that are different to the strategy performance.

Source of returns: Performance shown is based on the model portfolio held directly with Tacit Investment Management. If you access this model portfolio through an external platform, the underlying investments may differ slightly due to differences in fund and share class availability. Calculation basis: Returns are calculated on a total return basis, with income reinvested, net of UK tax. **Charges reflected:** Figures are shown net of the underlying funds' ongoing charges (OCF) and net of Tacit Investment Management's Discretionary Investment Management Service for Advisers Fees, a combined charge of 0.85% p.a. (0.50% annual discretionary investment management service fee plus 0.25% custody & settlement fee), including VAT. They are shown gross of any adviser charges, deducting these will reduce the performance illustrated. Speak to your financial adviser for details specific to your account. **Currency:** All figures are quoted in GBP sterling. **Benchmark:** Any benchmark performance shown is for comparison only and is also calculated on a total return basis. **CPI figures:** Because monthly CPI data is published with a delay, the current month's CPI is assumed flat, and the CPI target is calculated using the previous month's published figure. **Past performance:** Past performance is a guide only. Your actual returns may differ from those shown due to factors such as your investment date and platform-specific differences.
