

# TACIT TOTAL RETURN STRATEGY

AS AT 30 JUNE 2020

TACIT INVESTMENT MANAGEMENT  
AWARDED BY ARC

## INVESTMENT OBJECTIVE

The investment objective is to optimise the capital value of the portfolio. The Tacit Total Return Strategy is designed for an investor with a time horizon of more than 7 years, and a high tolerance for risk that can accept significant variation or disruption to capital value or current income in order to achieve their longer-term objective.

Within the Tacit Total Return Strategy, we would expect to maintain all of your funds in growth or real assets such as equities, property and commodities, which may exhibit higher short term volatility, when compared with lower risk asset classes.

This weighting to growth assets can be tactically adjusted to take account of prevailing market conditions but we would not expect this to be below 85% for a prolonged period at any time.

## SUITABILITY

This portfolio may be suitable for investors wishing to optimise their assets but can tolerate the drawdowns experienced by investing into equities alone. The aim is to maximise returns over the longer term with no risk constraints. This strategy is generally used during the accumulation phase rather than at drawdown.

## KEY RISKS

- + Equity markets fall
- + Inflation outstrips the return achieved
- + Change in risk appetite during volatile periods

**MIFID II FUND CHARGES:** A measure of the total costs associated with managing and operating a fund. This fee consists primarily of the management fee plus other expenses such as trustee, trading, custody, or operating expenses. It excludes Tacit Investment Management charges. The estimated current charge of the underlying portfolio is 0.61%.  
**Distribution Yield:** The distribution yield represents the ratio of distributed income over the last 12 months.
